PROFESSIONAL SUMMARY

Computer Science undergraduate with hands-on experience in machine learning, deep learning, and full-stack web development. Completed an AI/ML research internship at CSIR-CEERI on biomedical signal processing and a software development internship. Built AI-powered applications with Python, TensorFlow, React.js, and Node.js. Seeking Software Engineering or AI/ML roles.

TECHNICAL SKILLS

Languages: C++, Python, Java, JavaScript, SQL

Frontend: React.js, HTML5, CSS3, JavaScript, Chart.js

Backend: Node.js, Express.js, Flask, REST APIs

AI / ML: Machine Learning, Deep Learning, CNN, Computer Vision, TensorFlow, Keras, OpenCV, NumPy, Streamlit, Gemini AI, OpenAI API

Database & Tools: MySQL, Git, GitHub, Linux (Ubuntu), Docker, CI/CD, VS Code

Core CS: Data Structures & Algorithms, Object-Oriented Programming (OOP), DBMS

INTERNSHIPS

AI/ML Research Intern CSIR – Central Electronics Engineering Research Institute (CEERI), Pilani Jun '26 – Jul '26

- Implemented deep learning and signal processing techniques for fetal ECG extraction from maternal ECG signals.
- Developed and evaluated ECG feature detection models for accurate R-peak identification.
- Preprocessed and analyzed physiological signal datasets to improve model training and evaluation workflows.

Software Developer Intern Byte Band Technologies Private Limited May '26 – Jul '26

- Contributed to software design, development, and testing activities.
- Assisted in implementing and debugging application features.
- Collaborated with the development team to improve functionality and code quality.
- Participated in testing and validation of software modules.

PROJECTS

GestureTalk | Real-Time Sign Language to Speech Translation Aug '25 – Nov '25

- Developed a real-time sign language translation system using computer vision and deep learning to convert hand gestures into spoken language.
- Extracted 21 hand landmark keypoints using MediaPipe Hands and trained TensorFlow/Keras models on 63-dimensional feature vectors for gesture classification.
- Integrated Gemini and Hugging Face APIs for confidence-based sentence reconstruction and contextual output generation.
- Achieved 88% gesture recognition accuracy, 10–12 FPS processing performance, and ~2-second speech generation latency.

AI-Powered Plant Disease Detection System Tech: Python, TensorFlow, Keras, MediaPipe, OpenCV, Gemini API, Hugging Face, pyttsx3, gTTS Jan '26 – May '26

- Engineered a deep learning-based plant disease detection system using CNNs and TensorFlow, capable of classifying 38 plant disease categories from leaf images.
- Built an interactive web application using Streamlit and Flask, enabling real-time disease prediction with confidence scores and treatment recommendations.
- Integrated a Gemini AI-powered chatbot to provide plant health guidance, disease information, and preventive recommendations.
- Optimized image preprocessing and model inference pipelines, improving prediction speed and enhancing user experience.

AI-Powered Chronic Pain Tracking & Analysis System Tech: Python, TensorFlow, Keras, CNN, Streamlit, Flask, OpenCV, NumPy, Gemini AI Jan '26 – May '26

- Architected and developed an AI-powered chronic pain monitoring platform for tracking pain intensity, affected regions, symptoms, and daily health patterns.
- Built a full-stack web application featuring dashboards, pain history tracking, and trend visualization.
- Implemented AI-driven pain analysis to generate personalized recommendations, identify recurring pain triggers, and provide domain-specific health insights.
- Implemented interactive charts and analytics for monitoring pain progression and supporting data-driven self-management.
- Tech: React.js, Node.js, Express.js, MySQL, Chart.js, JavaScript, REST APIs, OpenAI API

CERTIFICATIONS & TRAINING

DevOps & Cloud Engineering EduNiketan Jun '26 – Jul '26

- Completed intensive hands-on training in DevOps and Cloud Engineering concepts, covering Git, GitHub, Linux, Docker, CI/CD pipelines, and cloud computing fundamentals.
- Worked on deployment workflows, version control, and automation practices with practical exposure to industry cloud services and DevOps tools.

Database Management System – Infosys Jul '26

Database and SQL – Infosys Sep '26

ACHIEVEMENTS

- Solved 100+ DSA problems on LeetCode, strengthening problem-solving and algorithmic thinking skills.
- Completed 2 technical internships in AI/ML and Software Development domains.
- Built and deployed full-stack and AI-powered applications using modern web and machine learning technologies.
