ABOUT ME

I am a Computer Science Engineering student at Lovely Professional University with a strong interest in Cloud Computing, DevOps, and Full Stack Web Development. I enjoy building scalable web applications, exploring AWS services, and learning modern software development practices. I am continuously improving my technical skills through hands-on projects and practical implementations.

EDUCATION

Lovely Professional University

Bachelor of Technology (Computer Science and Engineering)

SKILLS

Programming & Web: C++, Python, HTML, CSS, JavaScript, React.js, SQL

DevOps & Tools: Git, GitHub, Docker, GitHub Actions, Linux

Cloud Services: AWS EC2

EXPERIENCE

Computer Science Student actively learning Cloud Computing, DevOps and Web Development through academic projects and self-learning.

PROJECTS

1. Cloud Resume Website with CI/CD

- Built a responsive personal portfolio website.
- Containerized using Docker.
- Deployed on AWS EC2.
- Automated deployment using GitHub Actions CI/CD.

2. Full Stack Web Application

- Developed a responsive full-stack web application using modern frontend and backend technologies.

ACHIEVEMENTS

- Built and deployed projects using AWS and Docker.
- Implemented CI/CD pipelines using GitHub Actions.
- Strong understanding of Git and Linux.
